DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 01/05/2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

There are no copies of the foreign documents listed present.

Specification

2. The abstract of the disclosure is objected to because the content of the abstract is not directed to the present invention (it seems that it is relevant to the parent application). Correction is required. See MPEP § 608.01(b).

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 2878

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 3-5, 9-13, 15-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6278118. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim a radiation detection device comprising the same elements, such as light receiving array, scintillator layer, moisture layer and coating resin, with only slight language modifications in the claims.

5. Claims 8, 14, 20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2 of copending Application No. 09/893586. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim similar specifics of the scintillator and moisture-resistant layers of a radiation detector with only slight language modifications in the claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
